Dear Dr. Galinas & Drs. Plymale:

I saw this article about the evolution of teeth in my Washington Univ. journal and thought it was interesting. It may be "old news" to you, but wanted to share it in case you may be interested in some light professional reading. Enjoy!

Dr. Galinas, thanks for your call to check on me after my appointment. It is one of the nicest gestures to receive a call from you following a dental procedure in your office. It is a welcome part of your practice that makes patients feel special. I know you probably don't hear it often enough, but I think you are a skilled dentist and caring professional. It took me several years on the Treasure Coast to be able to feel comfortable with a dentist and I'm glad you were recommended to me. Thanks for taking such good care!

In addition, you bleed orange and blue! Go Gators!

Many thanks for all you do and your excellent care.
