

Dr. Galinis & Dr. Lippisch,

I am writing to express my deepest thanks for the exceptional care I received from you both and your remarkable staffs. It was a mere 18 months ago that I came to you to begin a 'Teeth-in-a-day' restoration to address my advancing gum disease. I am astounded to say without reservation that the pain, discomfort, and embarrassment I lived with for years somehow seem like a distant memory; I am amazed, relieved, inspired, and appreciative.

I am at least 6 months into a simple maintenance schedule and I must honestly tell you that there are times when I completely forget that I have a dental implant. I have had close friends and family tell me that they are not even conscious of it because it is so close to my own formerly healthy teeth. Oh, and I eat whatever I want and have only had to make very minor adjustments to my normal oral hygiene regimen. At the worst of my condition I did not dare to think that I would ever again achieve this level of comfort and relief.

The entire procedure: from the consults, to the planning, to the surgery, to the creation of the implant, to the follow up, was world-class. I had an almost negligible amount of down time after the procedure, more like what I would expect from having some wisdom teeth removed, and the postoperative attention was meticulous. It is hard for me to imagine receiving better care.

The grace with which you both do your work is also admirable; I never felt rushed, or troublesome, or patronized. Thanks to your talents and rigorous standards I am sure many individuals have felt themselves blessed after thinking they had nowhere to turn - I am one of them. You have quite literally put the smile back on my face.

In Enduring Gratitude,

Jason
